Why look at case studies?

#### Outline

#### Classic networks:

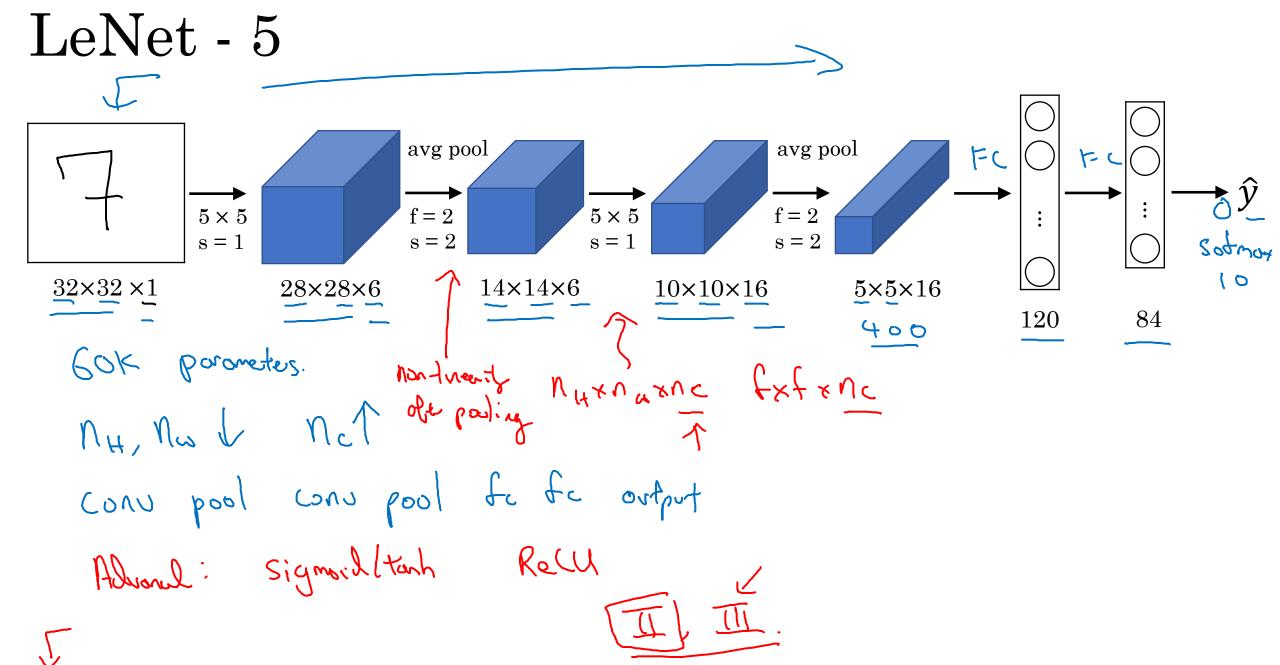

- LeNet-5 <
- AlexNet <
- VGG <

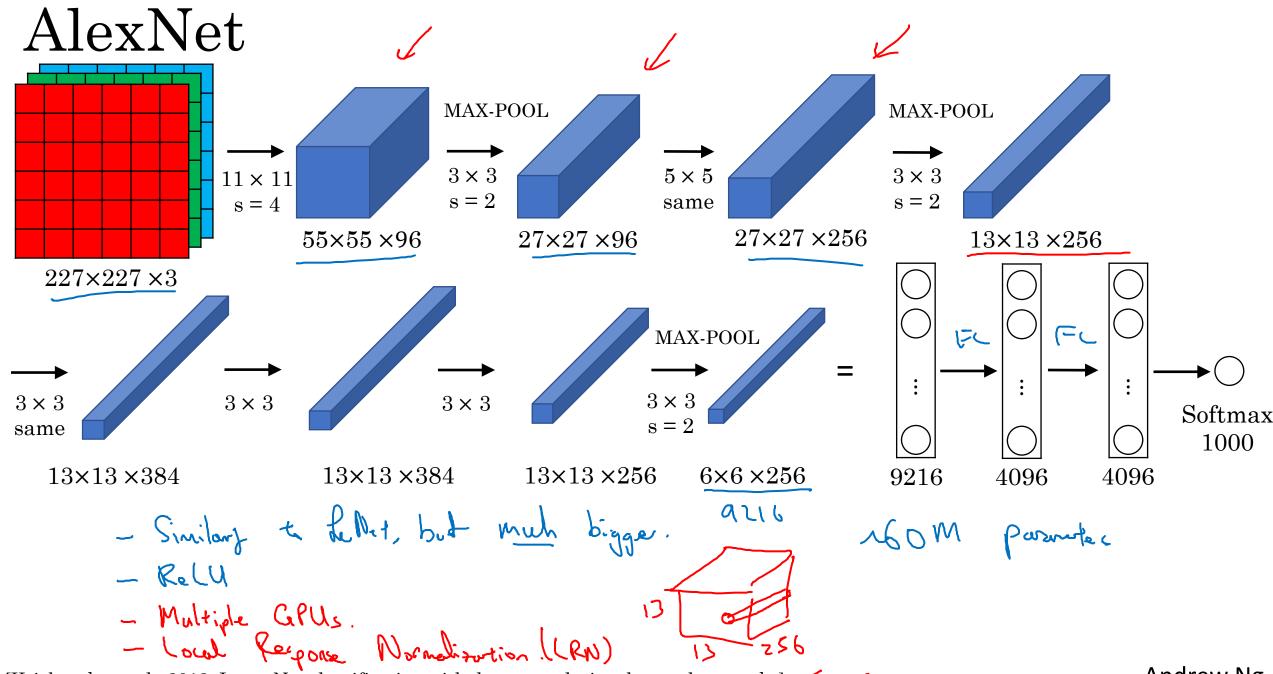

ResNet (152)

Inception

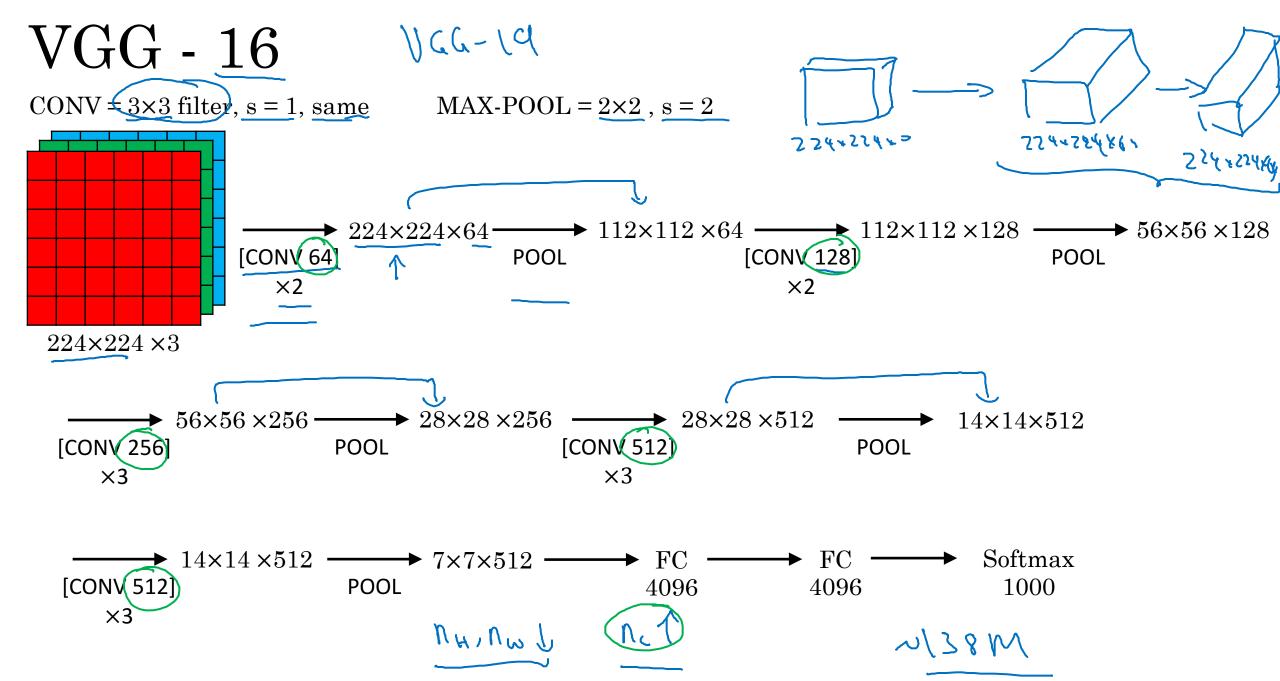

Classic networks

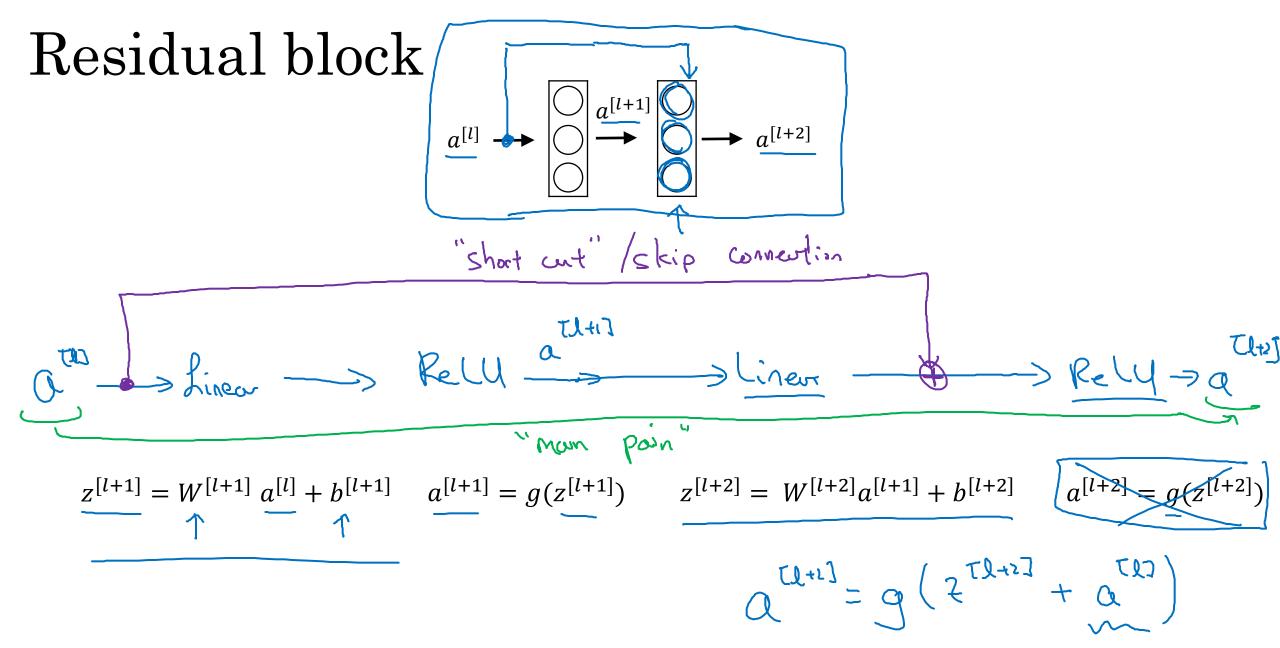

[Krizhevsky et al., 2012. ImageNet classification with deep convolutional neural networks]

Andrew Ng

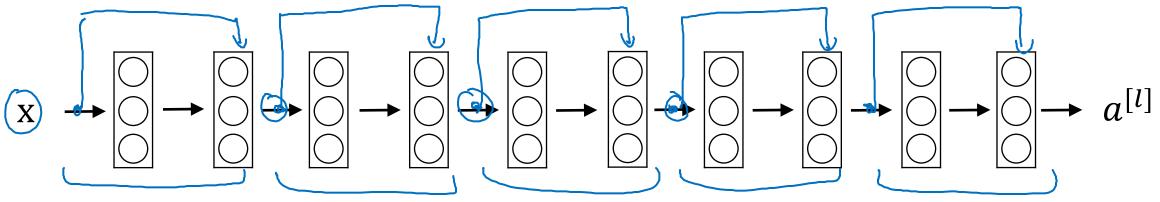

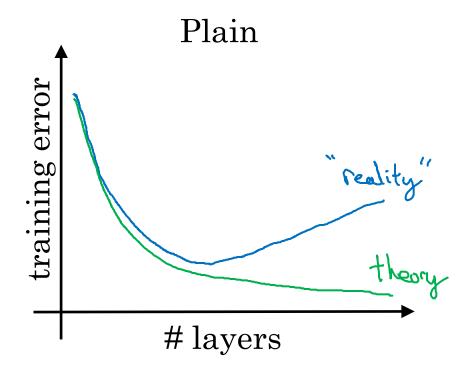

# Residual Networks (ResNets)

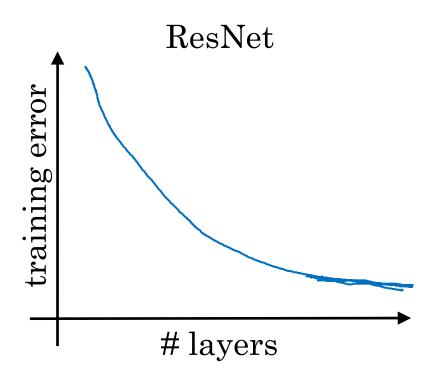

## Residual Network

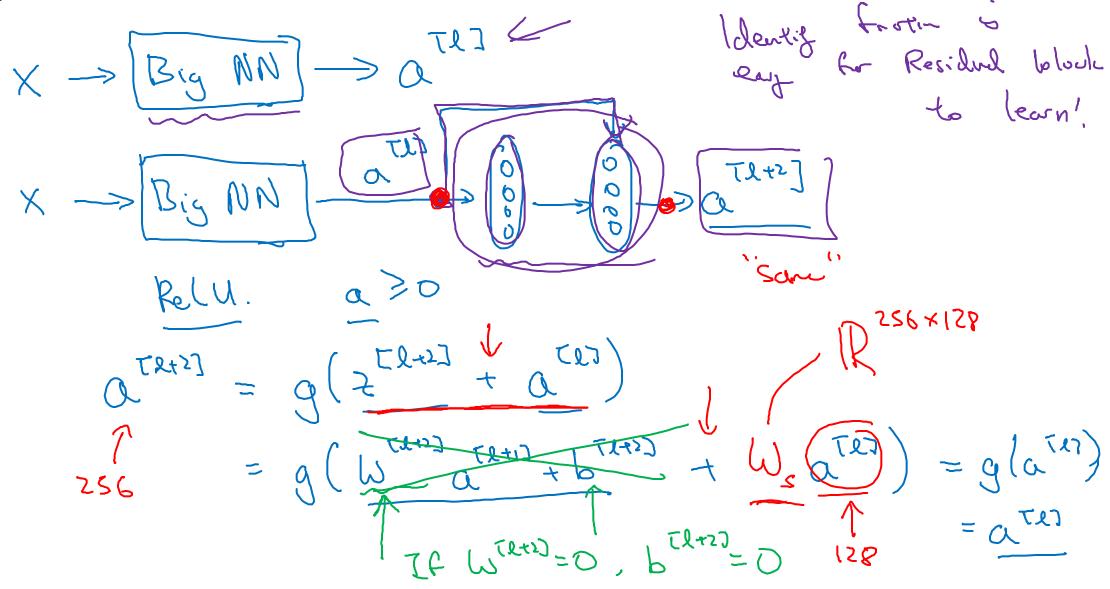

Andrew Ng

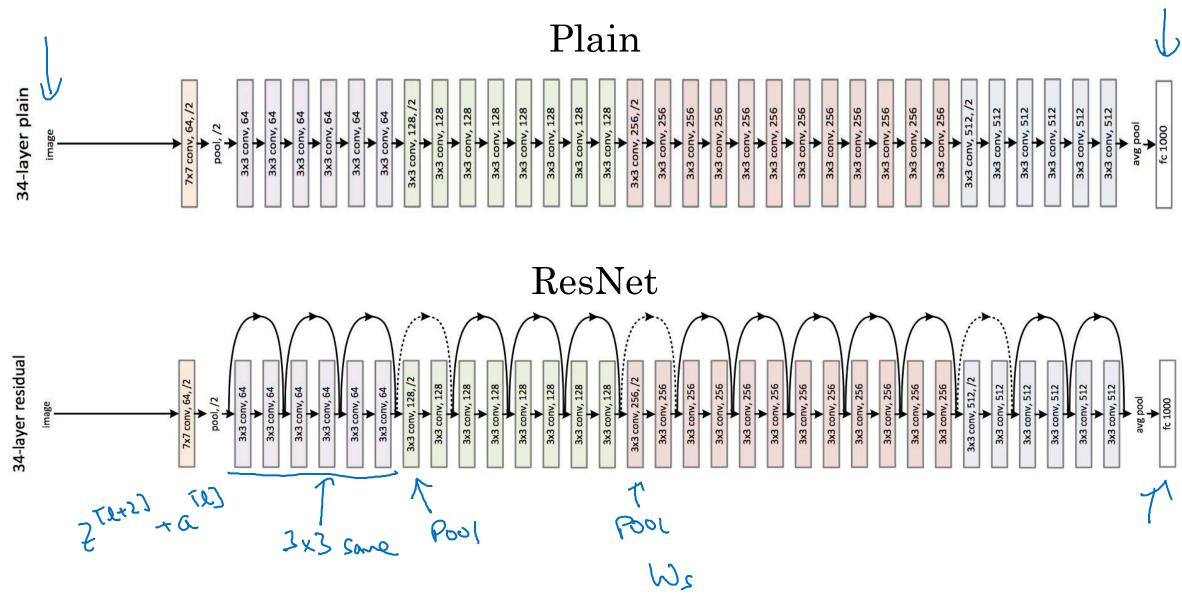

Why ResNets work

#### Why do residual networks work?

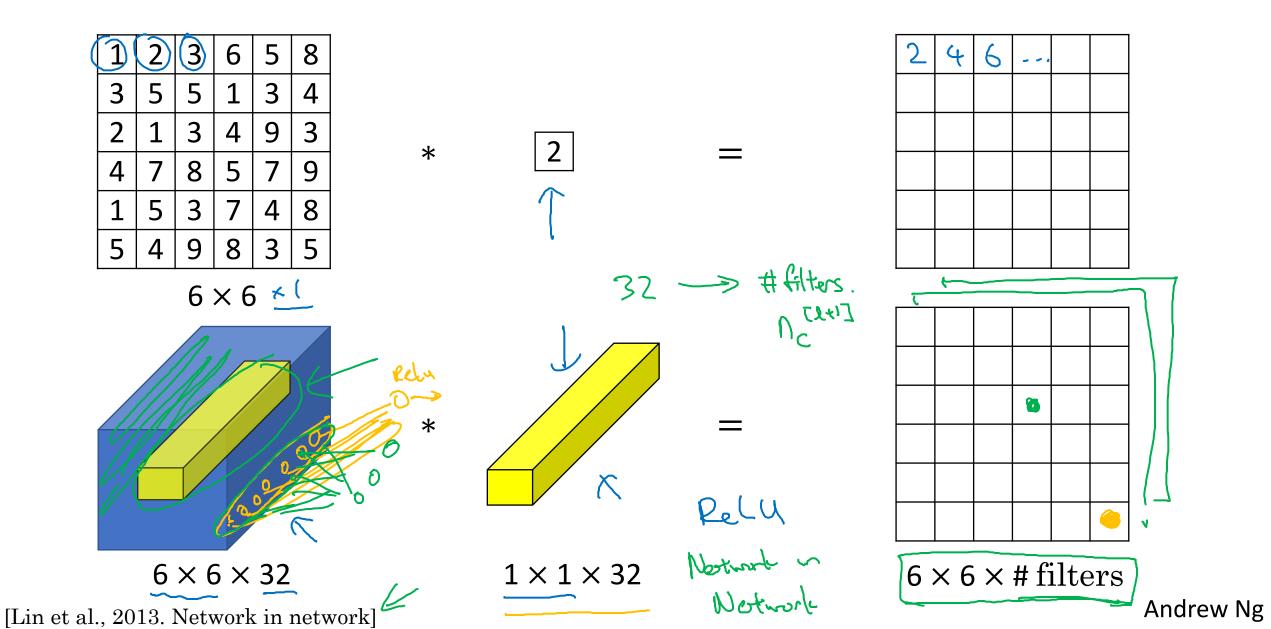

#### ResNet

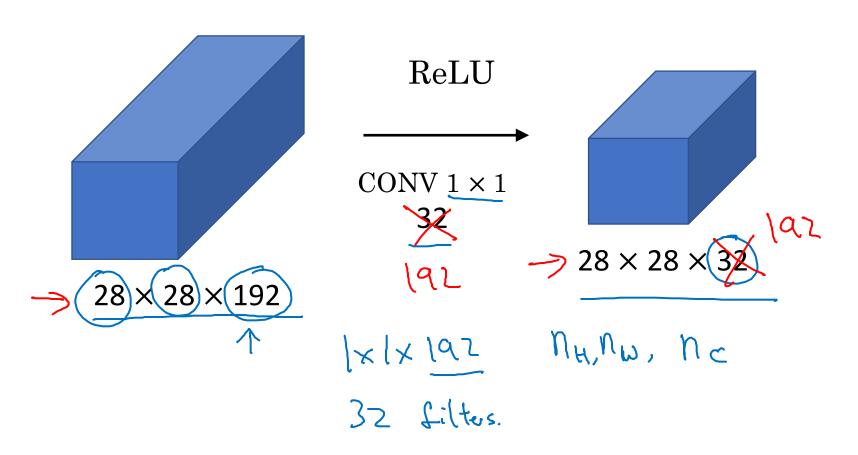

Network in Network and 1×1 convolutions

#### Why does a $1 \times 1$ convolution do?

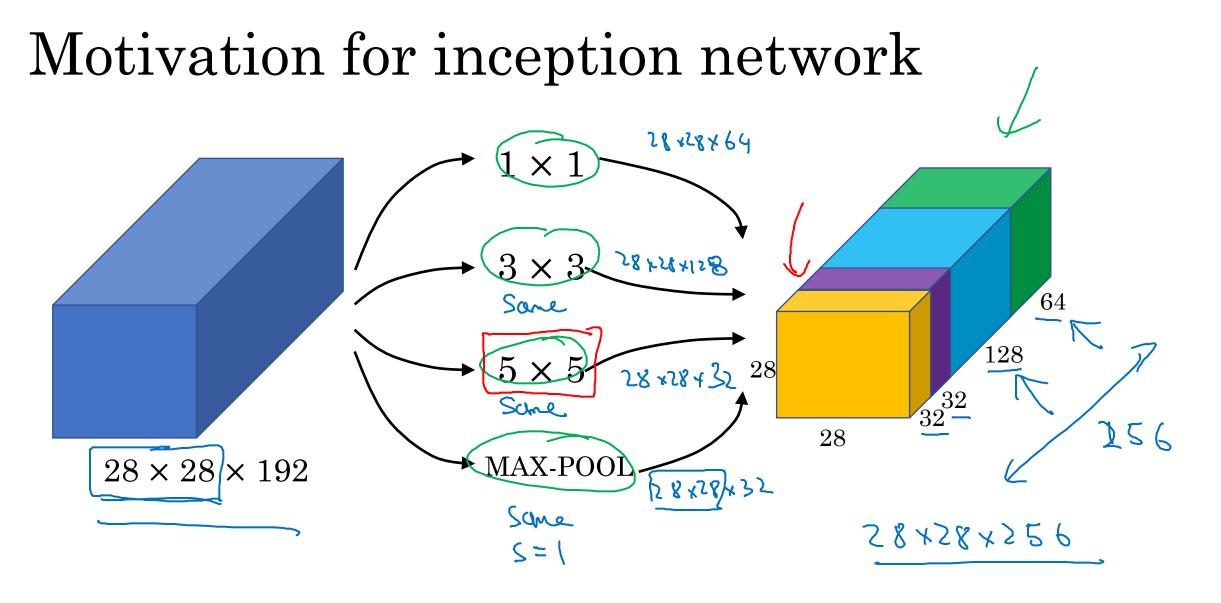

#### Using 1×1 convolutions

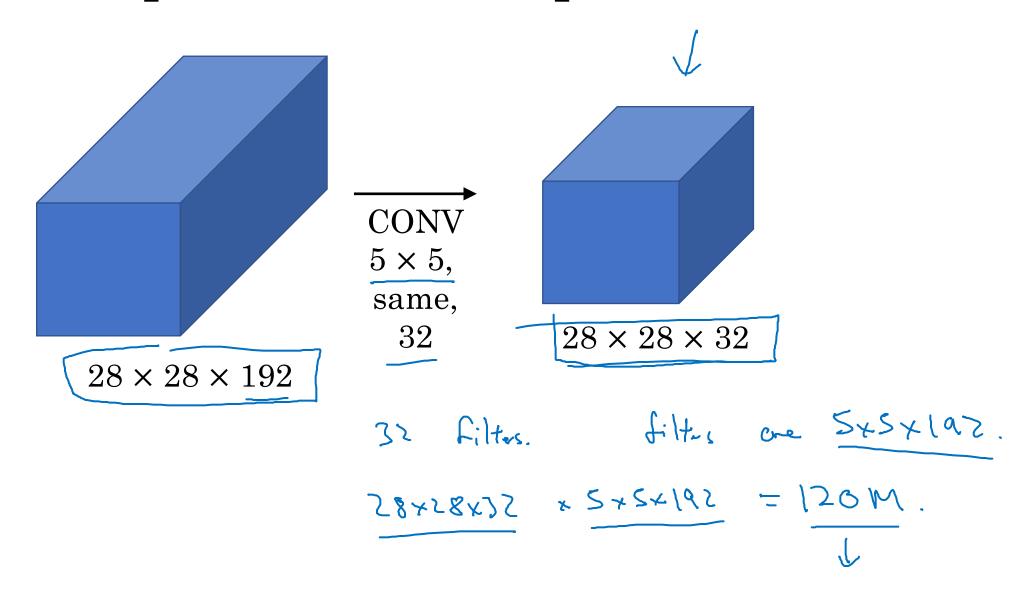

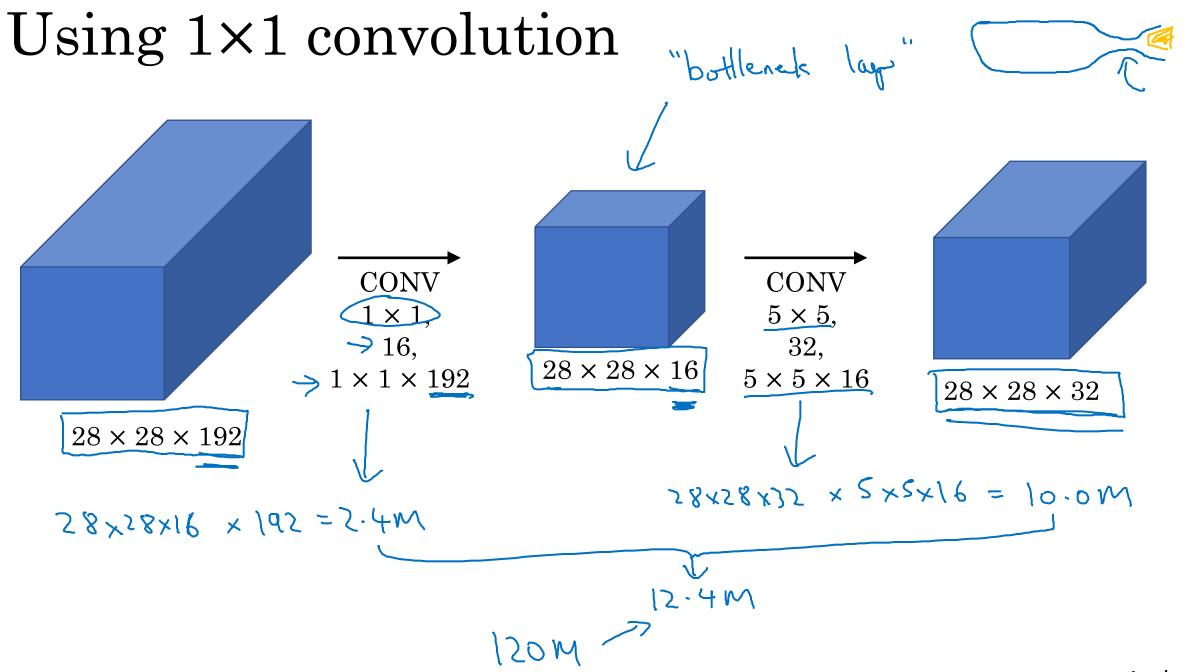

## Inception network motivation

#### The problem of computational cost

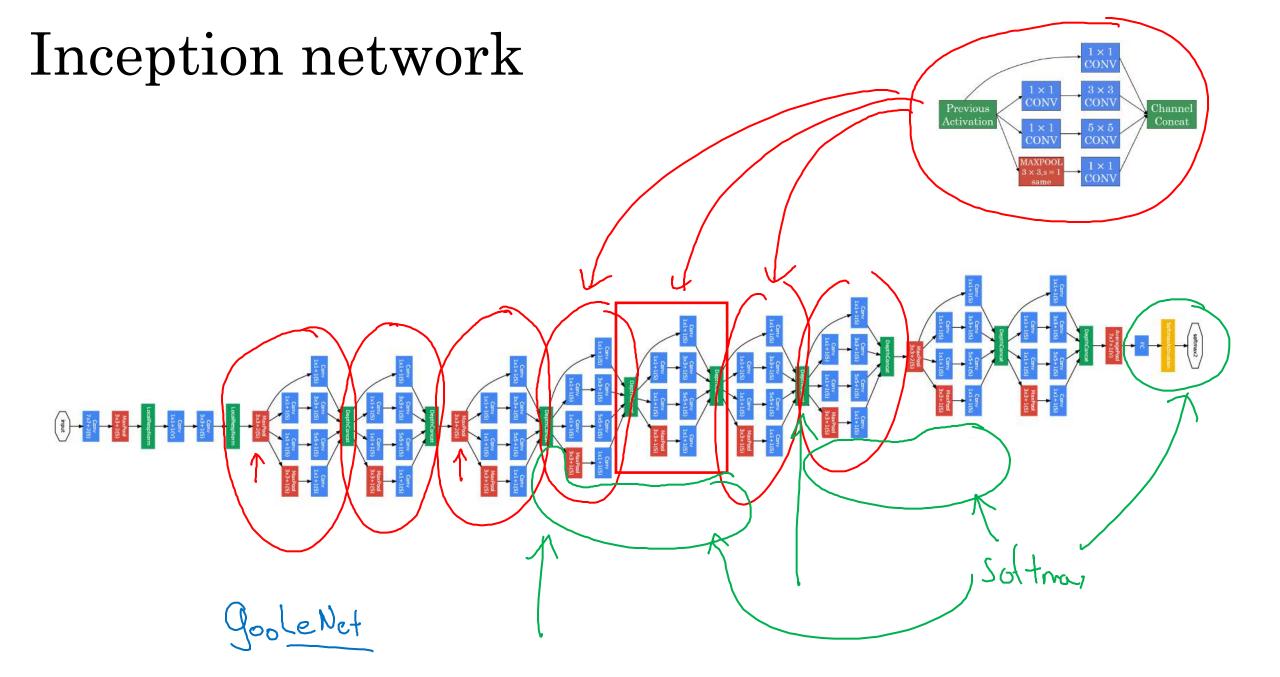

Inception network

#### Inception module 18x18x $1 \times 1$ 128 28 1 × 1 $3 \times 3$ 96 58.458(415/8) Channel Previous Activation Concat $5 \times 5$ $1 \times 1$ 28×28×192 58×58×526 $1 \times 1$ $3 \times 3, s = 1$

28 +28 × 192

32 filter, 1x1x197. Andrew Ng

## Convolutional Neural Networks

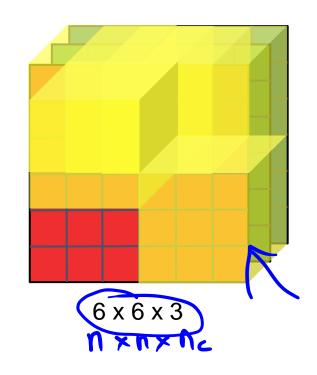

MobileNet

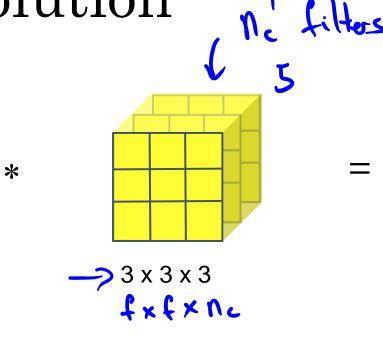

#### Motivation for MobileNets

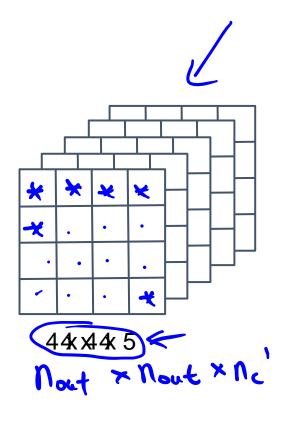

- Low computational cost at deployment
- Useful for mobile and embedded vision applications
- Key idea: Normal vs. depthwiseseparable convolutions

#### Normal Convolution

Computational cost

-> 2160

#filter params  $\mathbf{X}$ 3x3x3

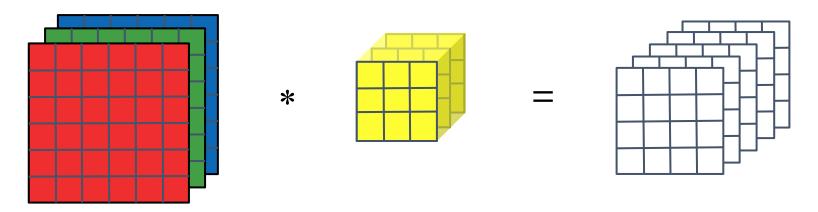

# filter positions

 $\mathbf{X}$ 

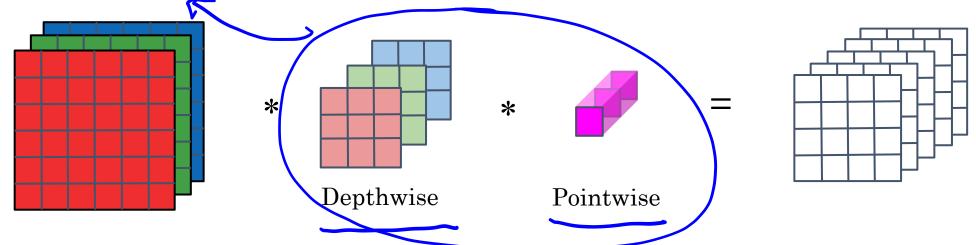

# of filters

#### Depthwise Separable Convolution

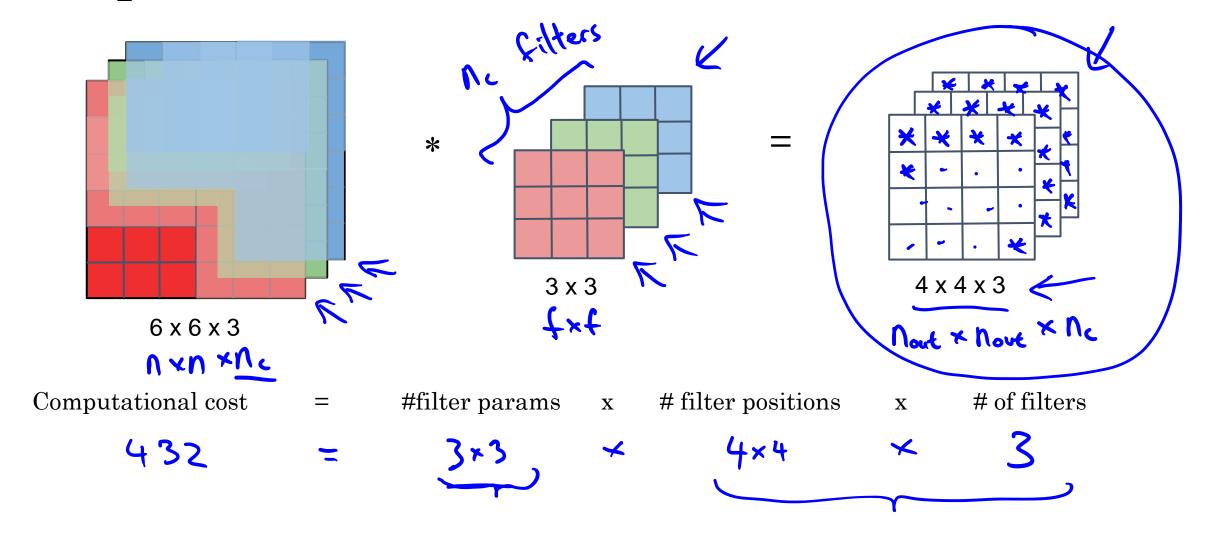

Normal Convolution

Depthwise Separable Convolution

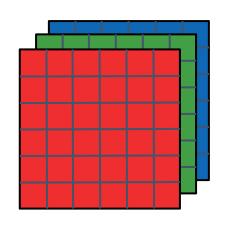

#### Depthwise Convolution

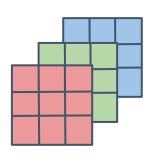

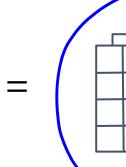

#### Depthwise Separable Convolution

Depthwise Convolution

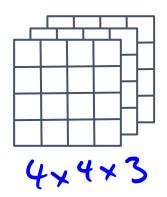

432

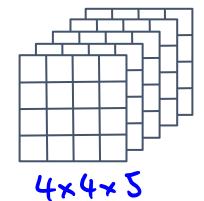

Pointwise Convolution

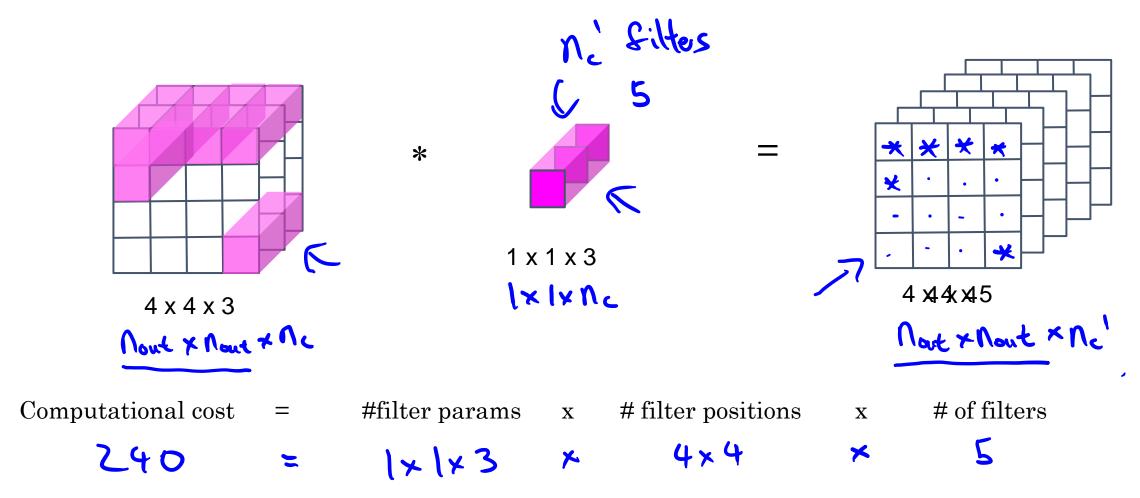

\*

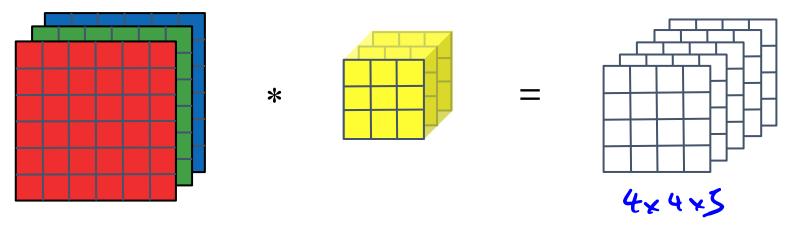

#### Pointwise Convolution

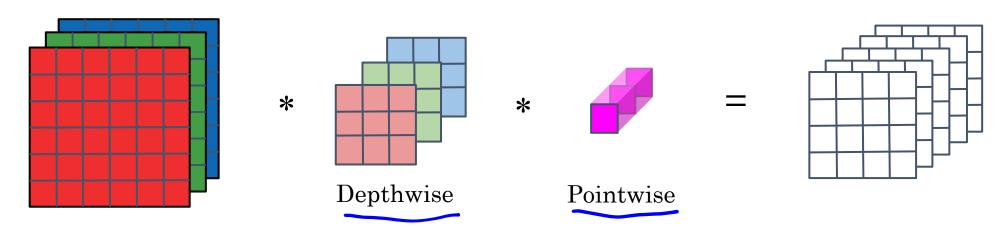

#### Depthwise Separable Convolution

Normal Convolution

Depthwise Separable Convolution

#### Cost Summary

Cost of depthwise separable convolution

depthwise + pointwise 
$$432 + 240 = 672$$

$$=\frac{1}{10} + \frac{1}{4}$$

$$=\frac{1}{512} + \frac{1}{32}$$

$$=\frac{1}{512} + \frac{1}{32} + \frac{1}{32}$$

$$=\frac{1}{512} + \frac{1}{32} + \frac{1}{3$$

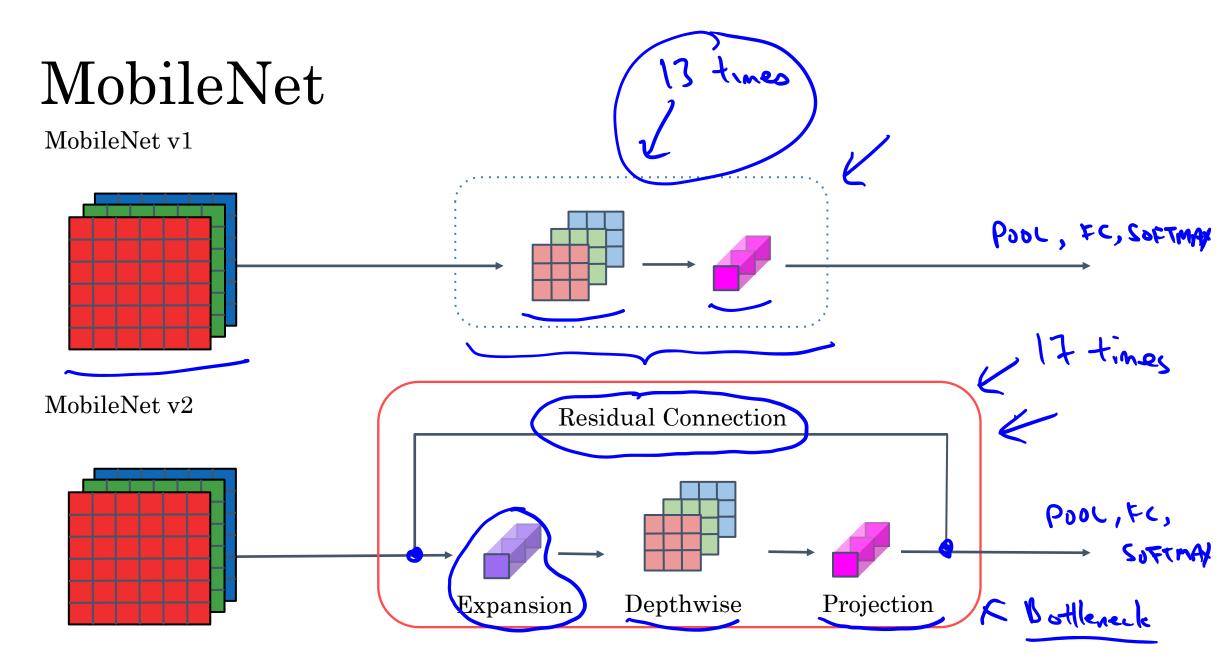

#### Depthwise Separable Convolution

Depthwise Convolution 4x4xnc Pointwise Convolution

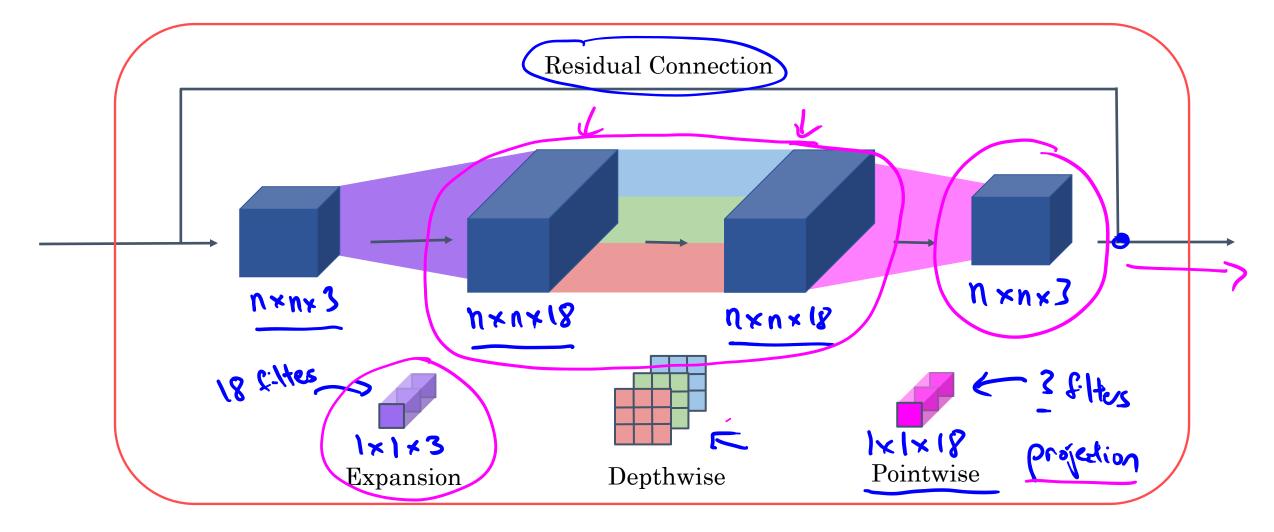

## Convolutional Neural Networks

## MobileNet Architecture

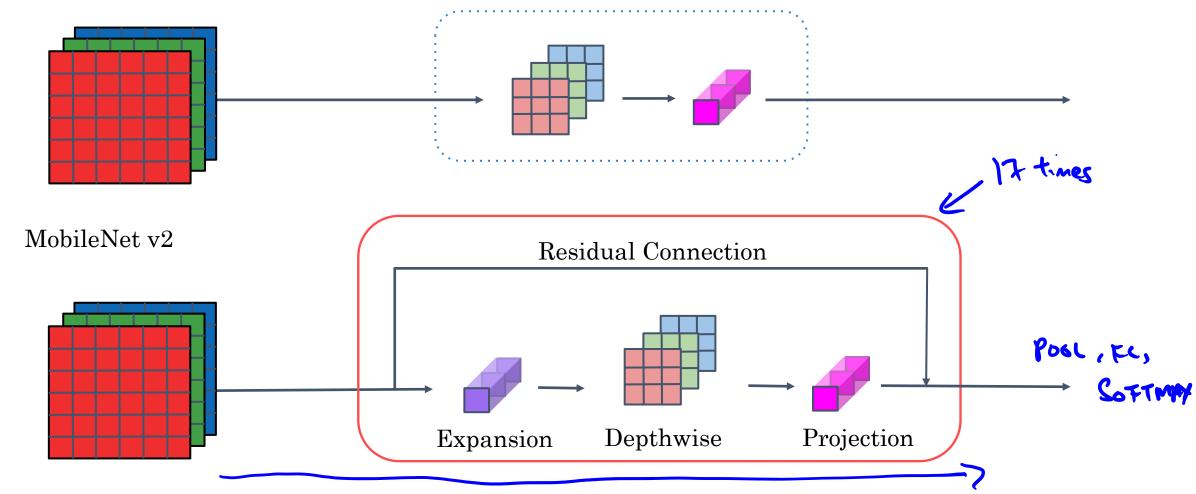

#### MobileNet v2 Bottleneck

#### MobileNet

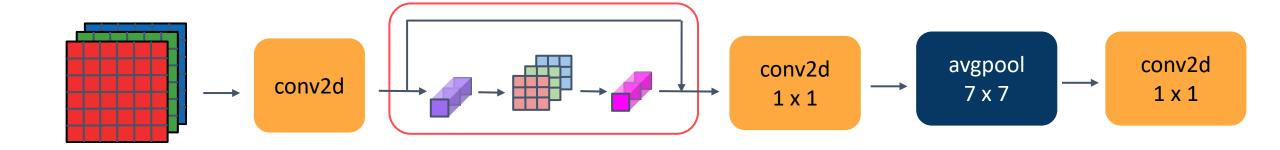

MobileNet v1

[Sandler et al. 2019, MobileNetV2: Inverted Residuals and Linear Bottlenecks]

Andrew Ng

#### MobileNet v2 Full Architecture

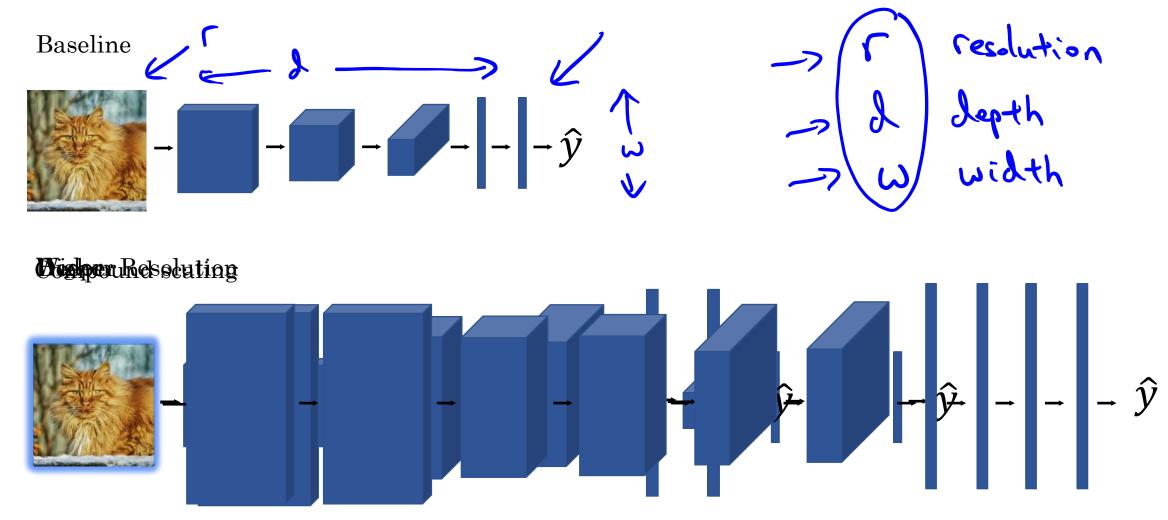

# Convolutional Neural Networks

EfficientNet

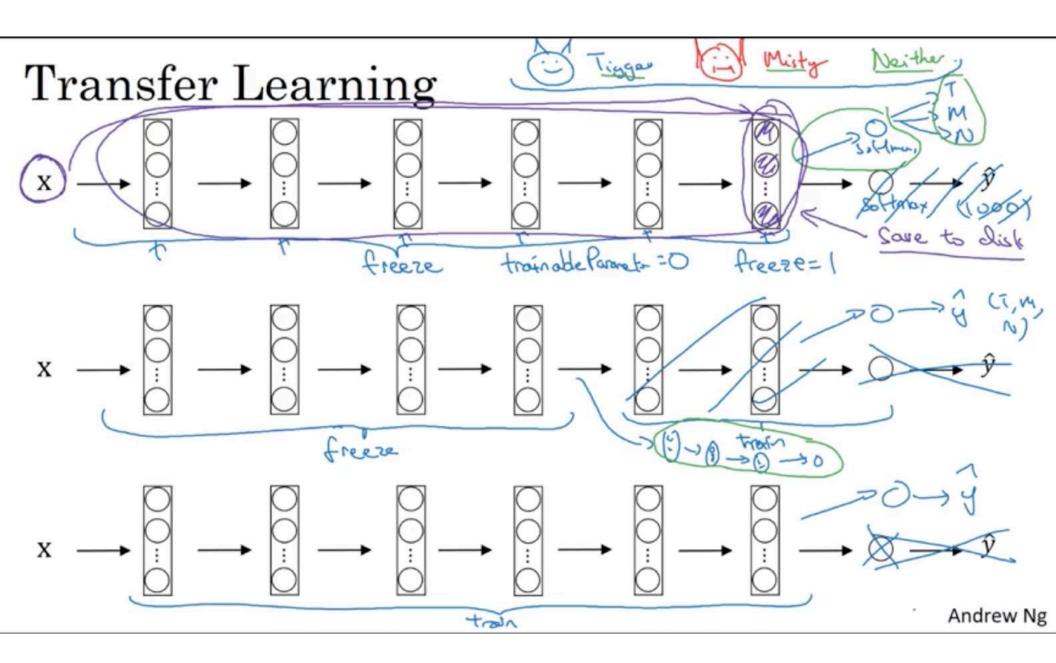

#### EfficientNet

# Practical advice for using ConvNets

# Transfer Learning

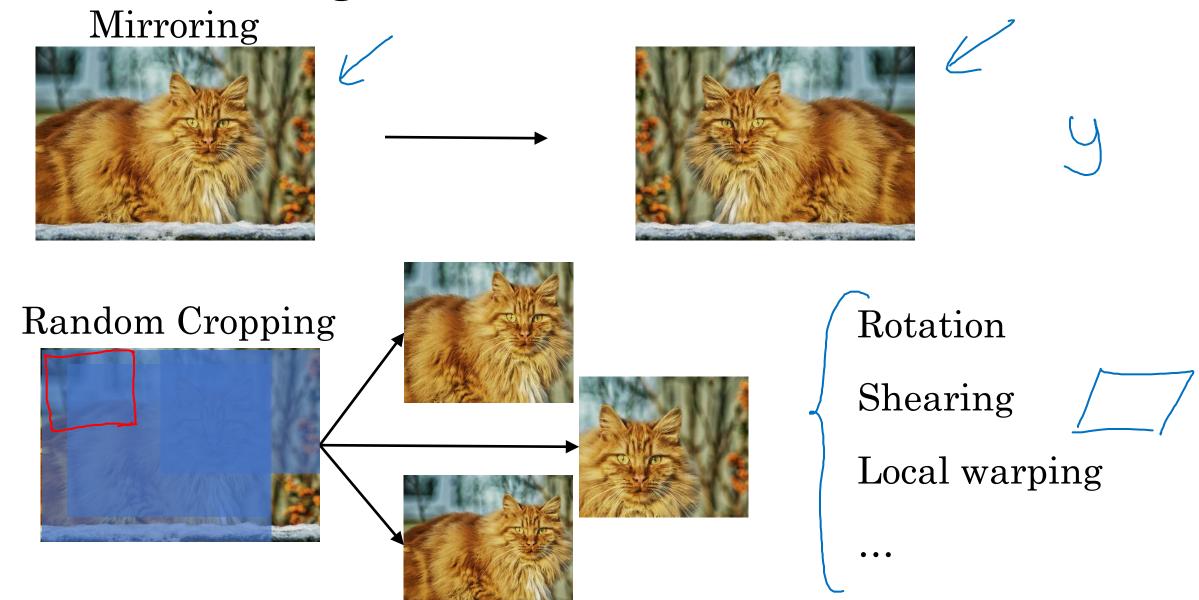

# Practical advice for using ConvNets

**Data** augmentation

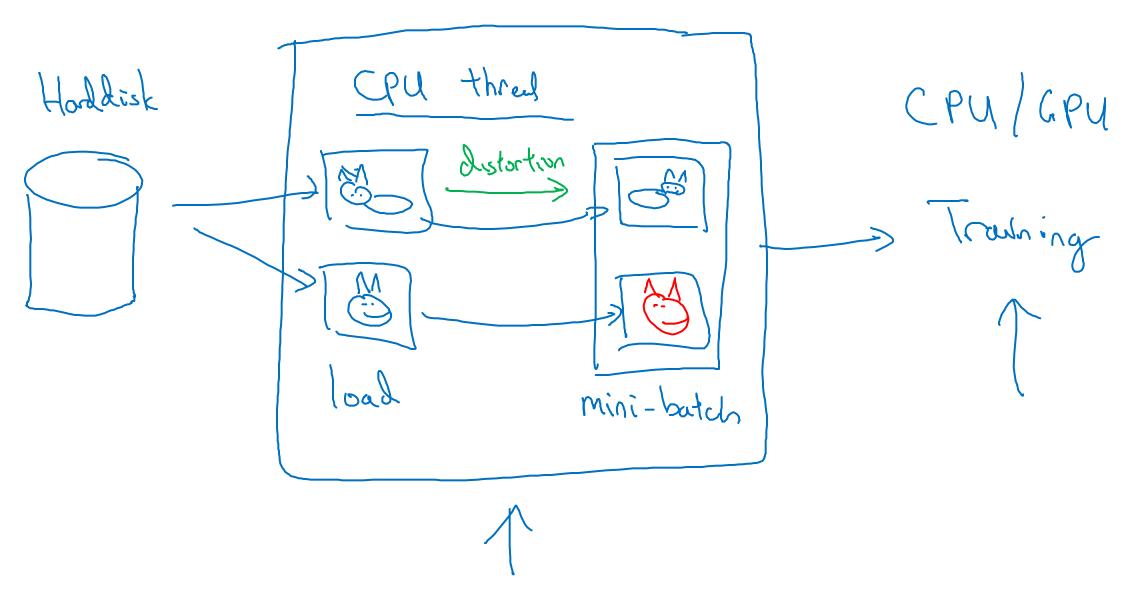

### Common augmentation method

Color shifting R GB +20,-20,+20 -20,+20,+20 +5,0,+50

Advanced! PCA ml-class.org [ Alex Net paper ["PCA color augustation."

### Implementing distortions during training

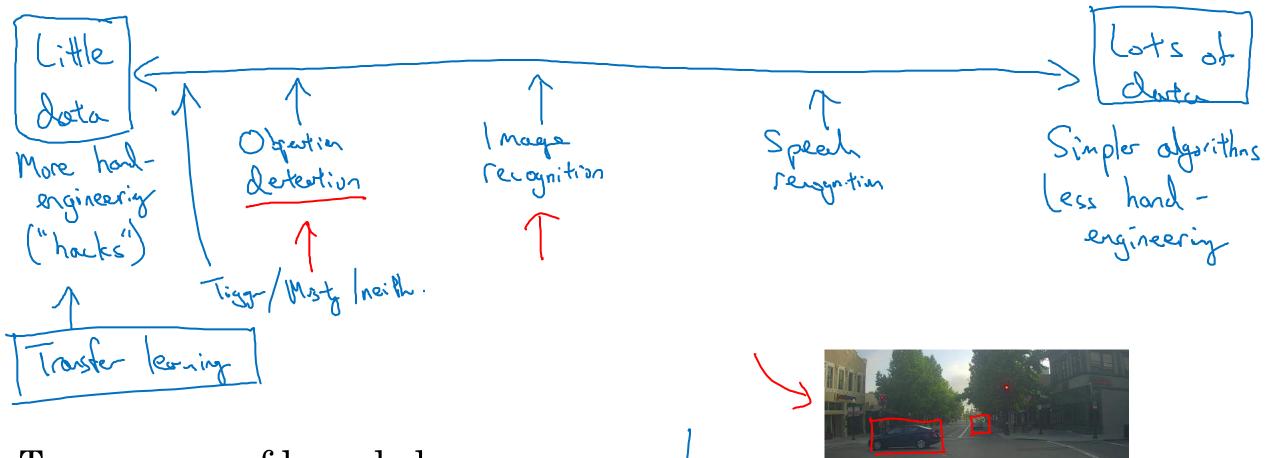

# Practical advice for using ConvNets

The state of computer vision

## Data vs. hand-engineering

Two sources of knowledge

- → Labeled data (44)
- Hand engineered features network architecture other components

  Andrew Ng

# Tips for doing well on benchmarks/winning competitions

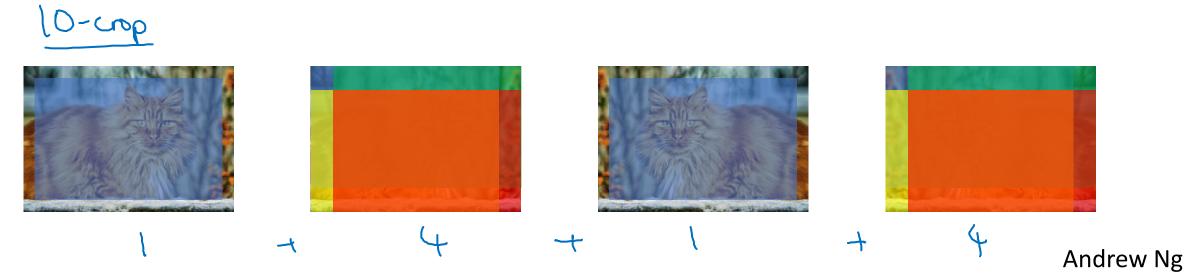

#### Ensembling

• Train several networks independently and average their outputs

#### Multi-crop at test time

• Run classifier on multiple versions of test images and average results

### Use open source code

• Use architectures of networks published in the literature

• Use open source implementations if possible

Use pretrained models and fine-tune on your dataset
